## CPS Mathematics Department <br> SY 20-21 Grade 8 Scope and Sequence

In grade 8 , instructional time should focus on three critical areas:
(1) formulating and reasoning about expressions and equations, including modeling an
association in bivariate data with a linear equation and solving linear equations and systems of linear equations;
(2) grasping the concept of a function and using functions to describe quantitative relationships; and
(3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem.
